Summary

Tata Steel makes flat and long steel products in India and overseas. Q1FY27 revenue rose 14.3% YoY to Rs 60,794 crore (NSE results filing) and profit excluding one-offs rose 17.5% YoY. Provisional Q2FY27 data shows India crude steel production up about 10% YoY to 6.21 million tonnes and sales up 7%. The board meeting for Q2FY27 results was moved from 27 October to 7 November 2026, and the NSE filings confirm that no newer results were published as of 1 November. The model target of Rs 217.1 implies 29.5% upside and is in line with the consensus mean of Rs 217.0; the composite score of 50 sits exactly at the quality gate, and conviction is Low because the DCF value of Rs 51.17 points the other way. Analyst view: the BUY rests on an earnings recovery that consensus prices at 1.9x trailing EPS; with net debt to equity of 0.82x and the price 13.5% below its 200-day average, we would treat it as a low-conviction call until Q2FY27 shows the margin gain in reported profit. ANALYST VIEW

We arrive at a 12-month target price of Rs 217.1 for Tata Steel Limited, a blend of relative P/E and street consensus. This implies +29.5% from the current market price of Rs 167.6. The stock scores 50 out of 100 on our six-pillar scorecard; the strongest pillar is Valuation (74) and the weakest is Technical trend (21). Rating: BUY with low conviction. MODEL

Key highlights

- Q2FY27 (provisional): India crude steel production of 6.21 million tonnes, up about 10% YoY from 5.64 million tonnes and up from 5.76 million tonnes in Q1FY27.
- Q2FY27 (provisional): total sales of 5.97 million tonnes, up 7% YoY.
- Q1FY27 revenue of Rs 60,794 crore, up 14.3% YoY; EBITDA excluding other income of Rs 9,264 crore, up 24.7% from Rs 7,428 crore in Q1FY26 (NSE results filings).
- FY26 net profit was Rs 10,794 crore after a loss of Rs 4,437 crore in FY24; FY24 included one-off charges of Rs 6,639 crore before tax (digest).
- 35 analysts have a mean target of Rs 217.0 (range Rs 175 to Rs 260), close to the model target of Rs 217.1.

- Shareholding on 30-Sep-2026: promoter 32.94% (33.19% a year earlier), FII 18.19%, DII 27.52%; no promoter shares pledged (NSE shareholding pattern).

Investment rationale (data-backed)

+ Latest quarter net profit excluding one-offs rose 17.5% year on year (Q1FY27 vs Q1FY26).
+ Profits convert to cash: operating cash flow averaged 5.01x of net profit over the last three years.
+ Trades at 17.6x trailing earnings, a 17% discount to its own FY-end median of 21.3x.
+ 35 analysts have a mean target of Rs 217.0 (+29.5% from the current price).
+ Institutions hold 45.7% (FII 18.2%, DII 27.5%) as of 30-Sep-2026.

Key risks and concerns

- Netherlands liquid steel production fell to 1.52 million tonnes in Q2FY27 from 1.67 million tonnes a year earlier, so European volumes are still weak. ANALYST VIEW
- Analyst view: consensus forward EPS of Rs 17.90 is 1.9x trailing EPS of Rs 9.53 excluding one-offs; the model caps it at 1.4x, but a weaker steel price cycle would still remove most of the upside. ANALYST VIEW
- The composite score of 50 is at the quality gate threshold; a score one point lower would cut the rating to HOLD. ANALYST VIEW
- Valuation cross-check: the DCF gives Rs 51.17 against a price of Rs 167.6, because the base free cash flow and 3% to 15% growth band do not capture a cyclical recovery. ANALYST VIEW
- Revenue declined at a 1.6% CAGR over FY23 to FY26 (Rs 2,41,636 cr to Rs 2,30,293 cr).
- Price trend is down: the stock is below its 200-day average (Rs 193.8) and the 50-day average is below the 200-day.
- Valuation cross-check disagrees: Discounted cash flow gives Rs 51.17, on the other side of the current price from the target of Rs 217.1.

Catalysts to watch

- Q2FY27 financial results at the board meeting on 7 November 2026: the first test of whether higher India volumes lift EBITDA.
- A sustained move back above the 200-day average of Rs 193.8 would reverse the current downtrend signal.

How the rating was reached

1. Upside of 29.5% to the blended target gives a base rating of BUY (BUY at 15% or more, SELL below -5%).
2. Composite score of 50 does not trigger a score gate.
3. Conviction is Low: an excluded valuation method points the other way. Discounted cash flow gives Rs 51.17, on the other side of the current price from the target of Rs 217.1.

Company profile

Tata Steel Limited engages in the manufacture and distribution of steel products in India and internationally. It offers reinforcement bars (rebars) and wire rods, cut-and-bend reinforcement bars, welded wire mesh, prefabricated cages (pre-cages), steel couplers and carpet reinforcement; hot-rolled, cold rolled, coated coil, tubes, rebar, wire rods; and metallic coated, pre-finished steels, alloy steels, and profiles and construction systems. The company also provides solutions in building envelopes, structural, fit-out, foundations, and highway engineering products, as well as operates steel service centers. It serves agricultural, automotive steels, construction, consumer goods, energy and power, engineering, and material handling industries. It has a strategic collaboration with Hindustan Zinc Limited to scale low-carbon zinc solutions. The company was incorporated in 1907 and is ...

Methodology and rating key

▲ BUY: upside 15% or more | ◆ HOLD: -5% to 15% | ▼ SELL: below -5% | Provisional: never BUY

- **Earnings basis.** EBITDA excludes other income and unusual items. Net profit is profit attributable to owners. One-off items are the source's unusual items plus any spike in other income (more than three times the median of the other periods, with the excess at least 10% of profit before tax); they are removed after tax at the period's effective rate for EPS, P/E history, growth scores and the target. This is an estimate; company-defined adjusted figures can differ. Quarterly comparisons are matched by period end date. Trailing EPS uses four consecutive quarters, or the latest full year when a quarter is missing.
- **Target price.** Weighted blend of a relative multiple (40%), an intrinsic method (30%: free cash flow DCF for non-financials, justified P/B for lenders) and the street consensus mean (30%). A method more than 2.5x or less than 0.4x the current price is excluded as an outlier; weights are renormalised. The blended target is capped at 1.15x the highest analyst target.
- **Relative multiple.** Forward EPS (consensus where it is between 0.5x and 1.4x of trailing EPS; capped at 1.4x trailing when consensus expects a sharper rebound, because a historical P/E applied to recovery earnings double counts the recovery; otherwise trailing EPS grown at the 3-year EPS CAGR bounded to -10% and 20%) times the median of the company's FY-end P/E history and the peer median P/E, bounded to 5x and 80x and capped at 1.25x the current P/E, so that no more than a 25% re-rating is assumed within 12 months. Lenders use forward book value and P/B with the same cap. Scenarios: bear case earnings 15% lower at 0.8x the lower of current and target multiple; bull case earnings 10% higher at 1.15x the target multiple.
- **DCF.** Base free cash flow is the average of the last three years. Growth for years 1 to 5 equals the revenue CAGR bounded to 3% and 15%, fading to terminal growth by year 10. The present value is rolled forward 12 months at the cost of equity less the dividend yield. An excluded method that lies on the other side of the current price from the target lowers conviction to Low.
- **Gates.** A BUY with composite score under 50 is cut to HOLD. A HOLD with score under 35 and upside under 5% becomes SELL. The rating is provisional, cannot be BUY and has Low conviction when only one valuation method is usable, a download the rating depends on failed, quarterly results are past their SEBI LODR deadline (45 days; 60 for the March quarter) but missing from the data, or research found newer results or a data conflict. Otherwise conviction reflects the score and the spread between methods.
- **Scorecard thresholds (0 to 100).** ROE 5% to 22% (lenders 8% to 18%); ROCE 6% to 25%; net debt to equity 1.5x to 0x; interest cover 1.5x to 10x; CFO to PAT 0.5x to 1.1x; revenue CAGR 0% to 15%; EPS CAGR -5% to 20%; P/E vs own median 1.4x to 0.8x; PEG on forward growth 3 to 1; free cash flow yield 0% to 5%; price vs 200-DMA -15% to +10%; relative return vs Nifty -15% to +15%; volatility 50% to 18%; drawdown -50% to -12%; beta 1.6 to 0.7. Upside to the model's own target is not scored.
- **Data.** Prices, annual statements, consensus and peer data from Yahoo Finance via the open-source yfinance library, fetched 01-Nov-2026 18:51 IST. Quarterly results, results board meeting dates and the shareholding pattern come from NSE filings (XBRL) where available; a filed quarter replaces Yahoo's figure for the same quarter, and differences above 2% (revenue) or 5% (profit) are listed in the data notes. If the exchange cannot be reached, the report uses Yahoo alone and says so. Figures are consolidated where the company reports them. Rs crore = Rs 10 million.
- **Freshness.** Results filed with the exchange, or considered at a results board meeting, for a quarter that is not in the model data make the rating provisional. A board meeting followed by a later meeting for the same quarter is treated as rescheduled.

DATA NOTES FOR THIS REPORT

- Exchange check: Q2FY27 results are not yet published (legal deadline 14-Nov-2026); the results board meeting is scheduled for 07-Nov-2026.
- Q4FY26 includes an estimated one-off charge of Rs 340.1 cr before tax (unusual items); profit excluding it is Rs 3,147 cr against Rs 2,926 cr reported.
- Q1FY27 includes an estimated one-off charge of Rs 345.5 cr before tax (unusual items); profit excluding it is Rs 2,543 cr against Rs 2,318 cr reported.
