

Audit Support Tool Launcher

Next-Generation Localhost Workspace for Automated GL Scrutiny & Statutory Testing

1-Click

ZERO SETUP EXECUTION

0 Installs

NO OS BLOAT / CLEAN RUN

0 Cloud Connections

100% ON-DEVICE DATA PRIVACY

⚠ PROBLEM STATEMENT

- **High Manual Burden:** Repetitive checking of GL lines, sampling stratifications, and manual JV postings.
- **Risk of Human Error:** Audit fatigue and missed anomaly thresholds across thousands of transactions.
- **Inefficient Workflows:** Hours drained on manual unpredictability sampling and query management.

✓ THE SOLUTION (.BAT TOOLKIT)

- **Localhost Automation:** Standalone .bat script initializes a fast local web app directly on your PC.
- **Standardized Rigor:** Pre-programmed testing algorithms aligned strictly with International Standards (ISAs).
- **Unified Reporting:** Single consolidated audit workbook generated with logs, ratings, and open queries.

HOW IT WORKS: SEAMLESS LOCAL EXECUTION

1 Windows Runs Launcher

Double-click the .bat file. A brief background command prompt window opens and automatically orchestrates the session.

2 Locates Tool Folder

The launcher script automatically switches into the adjacent audit-support-tool folder regardless of where it is stored.

3 Local Server Starts

Hands off seamlessly to start localhost, opening your secure, browser-based audit workspace on your private machine.

Launcher Script Snippet: Start_Audit_Support_Tool_Localhost.bat

```
@echo off
cd /d "%~dp0audit-support-tool"
call start_localhost.bat
```

COMPREHENSIVE AUDIT MODULES LAUNCHED

GL Scrutiny

ISA 315

Automated completeness tests, round-sum detection, missing narration flags, and related-party postings.

Sample Selection

ISA 530

Risk-based sampling stratified from OM/PM/CTT thresholds across counterparties, months, and value tiers.

JE/JV Testing

ISA 240

Identifies abnormal users, weekend/after-hours postings, and entries split just below approval authorization thresholds.

Unpredictability Testing

ISA 240

Targeted, unpredictable extractions outside the standard sample from operational areas not routinely tested.

Integrated Queries & Exceptions Log

All Procedures

Centralizes every exception raised across modules with risk ratings, review comments, and status tracking exportable to an Excel workbook.
