

AICA LEVEL 2 CAPSTONE PROJECT // BATCH 83

SMART BANK STATEMENT ANALYSER

AI-Assisted Transaction Anomaly Detection & Financial Threat Decision Support System

CANDIDATE INFORMATION

Candidate Name: CA Roshan Rana

Specialization: Chartered Accountant / AI Audit

Program & Batch: AICA Level 2 — Batch 83

CORE TECHNOLOGY STACK

AI Engine: Google Gemini 2.5 Flash

Frontend: React 19, Tailwind CSS v4

Backend & PDF: Express.js, jsPDF Vector Audit

The Surge in Digital Payment Fraud & Statement Complexities

Deceptive Collect Requests

Fraudsters issue inverted collect requests masquerading as refunds or cashback. Victims unknowingly authorize debits by entering their confidential UPI PIN.

Midnight Velocity Anomalies

Automated attacks executed during dormant hours (2:00 AM – 5:00 AM) or rapid bursts to siphon account balances prior to human intervention.

Statement Audit Overload

Forensic auditors and chartered accountants drown in thousands of micro-transactions, making manual fraud clustering and mule detection virtually impossible.

Dual-Layer Decision-Support Risk Framework

LAYER 1: DETERMINISTIC HEURISTIC ENGINE

Sub-millisecond mathematical rule verification:

- Baseline Deviation: Compares amount to 30-day user average ($>3x = +25$ pts)
- Dormant Hours: High-risk flags for debits between 2:00 AM – 5:00 AM (+20 pts)
- Velocity Bursts: Detects multi-debits within short rolling time windows (+20 pts)
- Device & Payee Novelty: Flags unverified hardware & new VPAs (+25 pts)
- Narration Keywords: Scans for lottery, reward, electricity, KYC threat terms

LAYER 2: GEMINI 2.5 FLASH AI REASONING

Deep contextual linguistics, psychology & behavioral audit:

- Coercive Psychology: Analyzes emotional urgency, legal panic & arrest threats
- Phishing & Malicious URLs: Flags masked APK links, bit.ly & lookalike domains
- Structured Audit Dossier: Synthesizes multi-transaction batches into briefs
- Strict JSON Schemas: Guarantees zero hallucinations with validated schemas
- Explainable Intelligence: Generates plain-language forensic justification

Fintech Analytics Dashboard & Live Transaction Audit

EXECUTIVE ANALYTICS DASHBOARD

- **Key Risk Indicators (KRI):** Real-time metrics for Monitored Volume, Total Capital, Flaged Anomalies, and Critical Incidents.
- **Risk Tier Metering:** Categorizes transactions into Low (0–29), Moderate (30–59), High (60–79), and Critical (80–100) tiers.
- **Anomaly Breakdown:** Visual charts decomposing Dormant Hours, Baseline Multipliers, New Device Remittances, and Suspicious VPAs.
- **Suspect Action Queue:** Direct one-click drilldown into the forensic single transaction audit engine.

LIVE SINGLE TRANSACTION AUDIT

- **10-Point Telemetry:** Ingests Txn ID, Amount, Value Date, Timestamp, Payee VPA, Device State, Velocity, and Narration.
- **Dynamic Risk Gauge (0–100):** Displays color-coded risk level alongside statistical confidence percentage.
- **Anomaly Signals:** Pinpoints exact red flags (e.g. "7.5x deviation above 30-day baseline during dormant hours").
- **Mitigation Roadmap:** Provides concrete steps: Helpline 1930 reporting, device de-linking, and cooling-off limits.

Historical Bank Statement Audit & Anomaly Mining

01. Universal CSV Ingestion

Accepts raw exports from SBI, HDFC, ICICI, Axis, PNB with intelligent header mapping for Value Date, Narration, and Debits.

02. Automated Scoring

Processes hundreds of banking records instantly, scoring baseline ratios and velocity triggers across the full timeline.

03. Dynamic Multi-Filter

Interactive search by VPA, Beneficiary, City, or Narration combined with instant Risk Tier filtering.

04. 1-Click Audit Workpaper

Exports standardized, enriched CSV audit workpapers complete with Risk Scores, Primary Anomalies, and Recommended Actions.

Forensic Utility: Reduces manual transaction review time by >80% while creating standardized CA workpapers.

AI Scam Message & Phishing Threat Verifier

ELECTRICITY BILL PANIC

Sample Attack Vector:

"Dear Customer, power will be disconnected at 9:30 PM due to unpaid bill. Call officer at 98xxxx immediately."

Psychological Tactic:

Fabricated Urgency & Fear of Disruption

**Verified Scam: Disregard and block number.
Never call unofficial contacts.**

FAKE LOTTERY / CASHBACK

Sample Attack Vector:

"Congratulations! You won Rs. 25,000 KBC reward. Click link to claim via UPI collect request immediately."

Psychological Tactic:

Greed Incentive & Inverted Collect Scheme

**Verified Scam: Entering UPI PIN ALWAYS DEBITS
money, never credits.**

EXPIRED KYC / MALWARE APK

Sample Attack Vector:

"SBI Notice: Netbanking suspended due to expired KYC. Download SBI_KYC_Update.apk from bit.ly/3x link."

Psychological Tactic:

Authority Impersonation & Remote RAT Malware

**Verified Scam: Banks never distribute APK files
via SMS or WhatsApp.**

Formal Investigation Dossier & Client-Side Vector PDF

COMPREHENSIVE AUDIT DOSSIER SPECIFICATIONS

- AI Forensic Summary: Synthesizes macro behavioral patterns, potential mule account chains, and timeline velocity spikes.
- Complete Evidence Table: Renders full transaction audit matrices with Risk Scores, Primary Anomalies, Beneficiaries, and Timestamps.
- Statutory Complaint Readiness: Incident timestamps and transaction hashes formatted specifically for law enforcement reporting.
- Pure Vector jsPDF Architecture: Generates razor-sharp, multi-page vector PDFs entirely inside the browser — completely bypassing iframe print dialog blocks.

REGULATORY COMPLIANCE

National Cyber Crime Portal:

- Official: cybercrime.gov.in
- 24x7 Helpline: 1930
- Golden Hour: File within 2 hours for inter-bank account freeze.

RBI Ombudsman Scheme (2021):

- Zero-Liability protection if unauthorized debit is reported within 3 working days
- Standardized evidentiary record simplifies claim settlement.

Responsible AI Principles & Zero Credential Policy

CONFIDENTIALITY

Zero Credential Exposure

The platform strictly adheres to zero-credential policies. It NEVER requests, stores, logs, or processes OTPs, UPI PINs, netbanking passwords, or CVV numbers.

HUMAN-IN-THE-LOOP

Decision Support Mandate

AI provides risk indicators and probabilistic ratings. It does not autonomously freeze funds, cancel accounts, or declare fraud without human review.

INTEGRITY

Hallucination Mitigation

All Gemini AI queries operate under rigid TypeScript JSON schemas, with continuous fallback to local mathematical heuristics if network degrades.

TRANSPARENCY

Mandatory Legal Notice

Persistent banners inform users: "High risk score does not establish fraud. Users should independently verify transactions and follow bank procedures."

Professional Utility for Chartered Accountants & Auditors

Forensic Accounting

- Rapidly isolate round-tripping & velocity spikes across complex accounts
- Detect layered remittances across suspicious mule VPAs
- Generate structured evidentiary workpapers for dispute resolution

Internal Controls Audit

- Evaluate corporate debit cards & corporate UPI usage compliance
- Identify unauthorized out-of-hours debits violating company policy
- Audit new vendor bank accounts prior to batch disbursement

Client Advisory Shield

- Provide SMEs with automated financial statement vulnerability health-checks
- Guide victims of phishing through Golden Hour 1930 recovery steps
- Standardize dispute dossiers for submission to RBI Banking Ombudsman

Conclusion & Submission Deliverables

PROJECT HIGHLIGHTS & OUTCOMES

' Full-Stack Production Readiness:

Complete React 19 + Express + Gemini 2.5 Flash implementation.

' Dual-Layer Decision Support:

Sub-millisecond mathematical heuristics combined with LLM reasoning.

' High-Density FinTech UX:

Compact, zero-fluff, accessible interface tailored for rapid auditing.

' Vector Export Capability:

Instant PDF Dossier & CSV workpaper generation for legal filing.

SUBMISSION CREDENTIALS

Candidate: CA Roshan Rana

Batch ID: AICA L2 BATCH 83_CA ROSHAN RANA

Repository:
