Preparation notes

- This report is generated from user-entered and imported prefill information. Reconcile it with AIS, Form 26AS, Form 16, books, challans and the applicable return utility.
- Sections 234A, 234B and 234C are calculated from the dates and cumulative advance-tax payments entered in the application. Review late-arising income relief, multiple tax payments and notified due-date extensions.
- For FY 2026-27, the Income-tax Act, 2025 applies. Familiar legacy section descriptions are retained for working-paper continuity where the corresponding provisions are renumbered.
