

Prompt for Mock interview

built a job-agnostic AI mock-interview web app with the same overall dark/glass/emerald visual direction. Included in the app • Multiple job families: Technology, Finance & Accounting, Tax & Audit, Engineering, Healthcare, Sales, Marketing, HR, Legal, Operations, Consulting, Product, Design, Education, Government, Retail, etc. • Organization + target role • Job description/specification input • Experience level • HR / Technical / Behavioural / Case assessment • Interactive Text • Speech Assistant • Voice + Camera • Gemini Live API via WebSocket • Ephemeral-token authentication so the permanent Gemini API key remains server-side • Google Search grounding for current company/industry information • Adaptive interview questions and follow-ups • Live transcript • Basic interview coaching indicators • Responsive mobile/desktop UI • Setup instructions and design prompt Google's current documentation confirms that ephemeral tokens are intended for client-to-server Live API applications and that the browser can connect using the short-lived token rather than exposing the permanent API key. It should be user friendly and it should not ask any API key.
