Summary

Dixon Technologies is an electronics manufacturing services company whose largest business is contract manufacturing of mobile phones. The Q2FY27 results filed with NSE on 30-Oct-2026 are now in the model data: revenue rose 46.7% YoY to Rs 21,794 crore, while profit to owners fell 48.7% YoY to Rs 343.7 crore because Q2FY26 included an estimated one-off other-income gain of Rs 387.9 crore; excluding one-offs, profit fell 3.7% YoY. The model target of Rs 17,376 implies 58.0% upside and blends relative P/E (Rs 19,250) with the consensus of 27 analysts (Rs 14,877); the DCF value of Rs 970.6 is excluded but points the other way, so conviction is Low. Analyst view: the relative value assumes both 40% earnings growth (the model cap) and a P/E of 69.9x against 55.9x today, and the target is 16.8% above the consensus mean; with profit excluding one-offs flat YoY on 47% revenue growth, we would treat the BUY as low conviction until margins stop falling. ANALYST VIEW

We arrive at a 12-month target price of Rs 17,376 for Dixon Technologies (India) Limited, a blend of relative P/E and street consensus. This implies +58.0% from the current market price of Rs 11,000. Re-rating capped: the history and peer anchor of 80.0x is more than 1.25x the current 55.9x, so 69.9x is used. The stock scores 65 out of 100 on our six-pillar scorecard; the strongest pillar is Quality (100) and the weakest is Relative strength (19). Rating: BUY with low conviction. MODEL

Key highlights

- Q2FY27 revenue of Rs 21,794 crore, up 46.7% YoY and 40.2% QoQ (NSE results filing, 30-Oct-2026).
- Q2FY27 EBITDA excluding other income of Rs 596.8 crore, a margin of about 2.7% against about 3.8% in Q2FY26 (Rs 561.3 crore on Rs 14,855 crore).
- Q2FY27 profit of Rs 410.9 crore including minority interest and Rs 343.7 crore to owners. This reconciles the two press figures: Rs 411 crore (Free Press Journal) is total profit and Rs 344 crore (The Hawk) is profit to owners.
- Q1FY27 reported profit of Rs 663.4 crore included an estimated one-off gain of Rs 420.5 crore before tax from other income of Rs 528.3 crore; excluding it, profit was Rs 316.8 crore.

- Shareholding on 30-Sep-2026: promoter 28.50% (28.92% a year earlier), FII 18.96%, DII 28.71% including mutual funds 19.26%; no promoter shares pledged (NSE shareholding pattern).

Investment rationale (data-backed)

+ Revenue grew at a 58.6% CAGR over FY23 to FY26 (Rs 12,173 cr to Rs 48,537 cr).
+ Earnings per share excluding one-offs compounded at 50.9% a year over FY23 to FY26.
+ Return on equity of 37.4% in FY26 is strong.
+ Profits convert to cash: operating cash flow averaged 1.29x of net profit over the last three years.
+ Trades at 55.9x trailing earnings, a 38% discount to its own FY-end median of 89.7x.
+ 27 analysts have a mean target of Rs 14,877 (+35.2% from the current price).
+ Institutions hold 47.7% (FII 19.0%, DII 28.7%) as of 30-Sep-2026.

Key risks and concerns

- Analyst view: the target depends on a re-rating. At the current P/E of 55.9x and trailing EPS of Rs 196.8, the bear case is Rs 10,472 (4.8% below the price) and the relative base case Rs 19,250 needs both 40% EPS growth and a 69.9x multiple. ANALYST VIEW
- Valuation cross-check: the DCF gives Rs 970.6 because free cash flow was only 0.47x of net profit over the base years. The price assumes cash generation the company has not yet shown. ANALYST VIEW
- Analyst view: the annual table shows FY26 one-offs of Rs 704.0 crore from the data source, more than the Rs 387.9 crore identified in the filed FY26 quarters, so FY26 EPS excluding one-offs (Rs 143.8) may be understated and the FY-end P/E history overstated. ANALYST VIEW
- Source inconsistency: balance-sheet equity implies book value of Rs 764.5 per share, against Rs 1,154 reported by the source. Return ratios should be checked against the annual report. ANALYST VIEW
- Market risk: the price is 16.8% below the 50-day average, RSI is 25.8, the stock fell as much as 38.4% in a year and underperformed the Nifty 50 by 18.7% over 12 months. ANALYST VIEW
- Underperformed the Nifty 50 by 18.7% over 12 months ((29.6)% vs (10.9)%).
- Fell as much as 38.4% from a peak in the last year.
- Valuation cross-check disagrees: Discounted cash flow gives Rs 970.6, on the other side of the current price from the target of Rs 17,376.

Catalysts to watch

- Q3FY27 results, due by 14-Feb-2027 under SEBI LODR; the test is whether EBITDA margin recovers from about 2.7%.
- A close back above the 200-day average, 8.9% above the current price, would reverse the current downtrend signal.

How the rating was reached

1. Upside of 58.0% to the blended target gives a base rating of BUY (BUY at 15% or more, SELL below -5%).
2. Composite score of 65 does not trigger a score gate.
3. Conviction is Low: an excluded valuation method points the other way. Discounted cash flow gives Rs 970.6, on the other side of the current price from the target of Rs 17,376.

Company profile

Dixon Technologies (India) Limited, together with its subsidiaries, engages in the manufacture and sale of electronic goods in India and internationally. The company offers display solutions, such as LED TVs, interactive flat panels, digital signages, and monitors; and lightning solutions, including special lamps, battens, bulbs, downlights, and strips and rope lights. It also provides home appliances comprising semi-automatic top loader and fully automatic top load; refrigerators; smartphones, foldable, and feature mobile phones; wireless wearables and hearables; computing devices; and telecommunication and networking products, which include 5G fixed wireless access devices, optical network terminals, and IPTV set-top boxes. In addition, the company is involved in the provision of electronic manufacturing services; trading; reverse logistics, such as repair and refurbishment of LED TV ...

EPS, DPS and book value per share are calculated on the current share count so that they stay comparable across bonus issues and splits. Return ratios use average equity and assets where two years are available.

Valuation

Exhibit 11: Target price build-up

Method	Key inputs	Value (Rs)	Weight
Relative P/E	Trailing EPS: Rs 196.8 (four quarters to Q2FY27, excluding one-offs) Forward EPS (12m): Rs 275.6 (consensus Rs 277.8 is 1.4x trailing; capped at 1.4x) Own FY-end P/E median: 89.7x Peer median P/E: 71.0x Current P/E: 55.9x Target P/E applied: 69.9x (capped at 1.25x current)	Rs 19,250	57%
Discounted cash flow Excluded as an outlier: Rs 970.6 is outside 0.4x to 2.5x of the current price. Free cash flow was only 0.47x of net profit over the base years (capex and working capital absorbed cash), so a DCF on historical cash flow understates value while the company invests for growth. The gap is still a warning: the price assumes cash generation the company has not yet shown.	Base FCF (avg of last 3 yrs): Rs 308.4 cr FCF / net profit (same years): 0.47x Growth yrs 1-5 (fades to terminal by yr 10): 15.0% Terminal growth: 5.0% WACC: 15.2% Enterprise value: Rs 5,282 cr Less net debt: Rs 124.6 cr Terminal value share of EV: 45% Fair value today: Rs 843.2	Rs 970.6	0%
Street consensus	Analysts: 27 Mean target: Rs 14,877 Low / high target: Rs 8,817 / Rs 17,800 Consensus view: -	Rs 14,877	43%
Blended 12-month target		**Rs 17,376**	100%

- Re-rating capped: the history and peer anchor of 80.0x is more than 1.25x the current 55.9x, so 69.9x is used.
- Conflict: Discounted cash flow gives Rs 970.6, on the other side of the current price from the target of Rs 17,376.

Methodology and rating key

▲ BUY: upside 15% or more | ◆ HOLD: -5% to 15% | ▼ SELL: below -5% | Provisional: never BUY

- **Earnings basis.** EBITDA excludes other income and unusual items. Net profit is profit attributable to owners. One-off items are the source's unusual items plus any spike in other income (more than three times the median of the other periods, with the excess at least 10% of profit before tax); they are removed after tax at the period's effective rate for EPS, P/E history, growth scores and the target. This is an estimate; company-defined adjusted figures can differ. Quarterly comparisons are matched by period end date. Trailing EPS uses four consecutive quarters, or the latest full year when a quarter is missing.
- **Target price.** Weighted blend of a relative multiple (40%), an intrinsic method (30%: free cash flow DCF for non-financials, justified P/B for lenders) and the street consensus mean (30%). A method more than 2.5x or less than 0.4x the current price is excluded as an outlier; weights are renormalised. The blended target is capped at 1.15x the highest analyst target.
- **Relative multiple.** Forward EPS (consensus where it is between 0.5x and 1.4x of trailing EPS; capped at 1.4x trailing when consensus expects a sharper rebound, because a historical P/E applied to recovery earnings double counts the recovery; otherwise trailing EPS grown at the 3-year EPS CAGR bounded to -10% and 20%) times the median of the company's FY-end P/E history and the peer median P/E, bounded to 5x and 80x and capped at 1.25x the current P/E, so that no more than a 25% re-rating is assumed within 12 months. Lenders use forward book value and P/B with the same cap. Scenarios: bear case earnings 15% lower at 0.8x the lower of current and target multiple; bull case earnings 10% higher at 1.15x the target multiple.
- **DCF.** Base free cash flow is the average of the last three years. Growth for years 1 to 5 equals the revenue CAGR bounded to 3% and 15%, fading to terminal growth by year 10. The present value is rolled forward 12 months at the cost of equity less the dividend yield. An excluded method that lies on the other side of the current price from the target lowers conviction to Low.
- **Gates.** A BUY with composite score under 50 is cut to HOLD. A HOLD with score under 35 and upside under 5% becomes SELL. The rating is provisional, cannot be BUY and has Low conviction when only one valuation method is usable, a download the rating depends on failed, quarterly results are past their SEBI LODR deadline (45 days; 60 for the March quarter) but missing from the data, or research found newer results or a data conflict. Otherwise conviction reflects the score and the spread between methods.
- **Scorecard thresholds (0 to 100).** ROE 5% to 22% (lenders 8% to 18%); ROCE 6% to 25%; net debt to equity 1.5x to 0x; interest cover 1.5x to 10x; CFO to PAT 0.5x to 1.1x; revenue CAGR 0% to 15%; EPS CAGR -5% to 20%; P/E vs own median 1.4x to 0.8x; PEG on forward growth 3 to 1; free cash flow yield 0% to 5%; price vs 200-DMA -15% to +10%; relative return vs Nifty -15% to +15%; volatility 50% to 18%; drawdown -50% to -12%; beta 1.6 to 0.7. Upside to the model's own target is not scored.
- **Data.** Prices, annual statements, consensus and peer data from Yahoo Finance via the open-source yfinance library, fetched 01-Nov-2026 18:51 IST. Quarterly results, results board meeting dates and the shareholding pattern come from NSE filings (XBRL) where available; a filed quarter replaces Yahoo's figure for the same quarter, and differences above 2% (revenue) or 5% (profit) are listed in the data notes. If the exchange cannot be reached, the report uses Yahoo alone and says so. Figures are consolidated where the company reports them. Rs crore = Rs 10 million.
- **Freshness.** Results filed with the exchange, or considered at a results board meeting, for a quarter that is not in the model data make the rating provisional. A board meeting followed by a later meeting for the same quarter is treated as rescheduled.

DATA NOTES FOR THIS REPORT

- Source inconsistency: balance-sheet equity implies book value of Rs 764.5 per share, but the source reports Rs 1,154. Statement-based ratios (ROE, P/B history) may be affected; check the latest annual report.
- ROE check: calculated FY26 ROE is 37.4% (average equity) while the source reports 30.6% (trailing). Treat ROE-based scores with care.
- Q1FY27 includes an estimated one-off gain of Rs 420.5 cr before tax (other income spike); profit excluding it is Rs 316.8 cr against Rs 663.4 cr reported.
