Bill Bol — User Manual and Guide

Oct 22, 2026 · @Vishal

This manual shows field staff how to record tour and site expenses by voice, attach bills and submit a reimbursement claim in Bill Bol. It also shows accountants how to connect the Google Sheet database.

You need: an Android phone with Chrome or an iPhone with Safari, internet for the first opening and for uploads, and the Bill Bol link sent by your office or accountant. Bill Bol works in English, Hindi and Tamil; tap EN, हि or த at the top to change the language at any time.

Install the app

Android (Chrome)

1. Open the Bill Bol link in **Chrome**. If it opened inside WhatsApp, tap **Open in Chrome** on the orange card.
2. Tap **Install app** on the card, or tap ⋮ (top right) → **Install app**.
3. Bill Bol appears on the home screen like any other app.

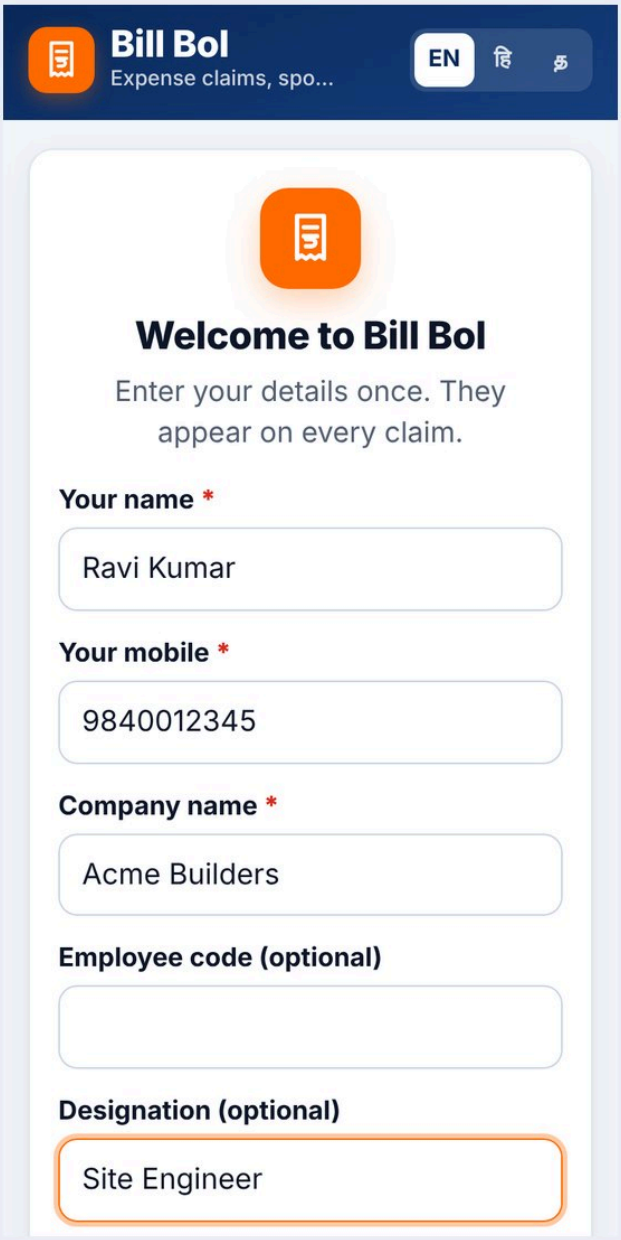

iPhone (Safari)

1. Open the Bill Bol link in **Safari**.
2. Tap the Share button □↑ at the bottom → **Add to Home Screen** → **Add**.
3. For voice, switch on Settings → General → Keyboard → **Enable Dictation**.

Allow the **microphone** and **camera** when the app asks. Once installed, the app opens even without signal; entries upload when the phone is back online.

Step 1: Fill your profile

The first screen asks for your details. They print on every claim, so this is done once.

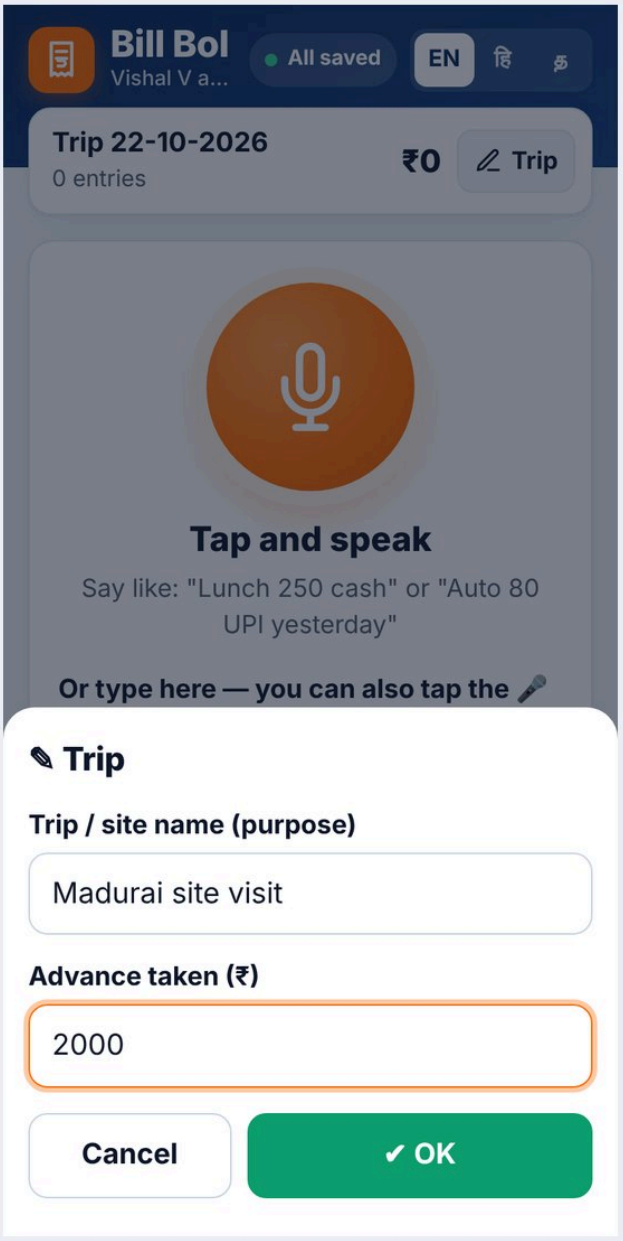

1. Enter **Your name**, **Your mobile** (10 digits) and **Company name**. These three are required (marked *).
2. Employee code, designation and email are optional.
3. Choose your language: English, हिन्दी or தமிழ்.
4. Tap **Save and continue**. The rest of the app opens only after this.

If your office sent a setup link, open it first; a green bar shows "Your company is connected". You can change these details later under **Profile**.

Step 2: Set up the trip

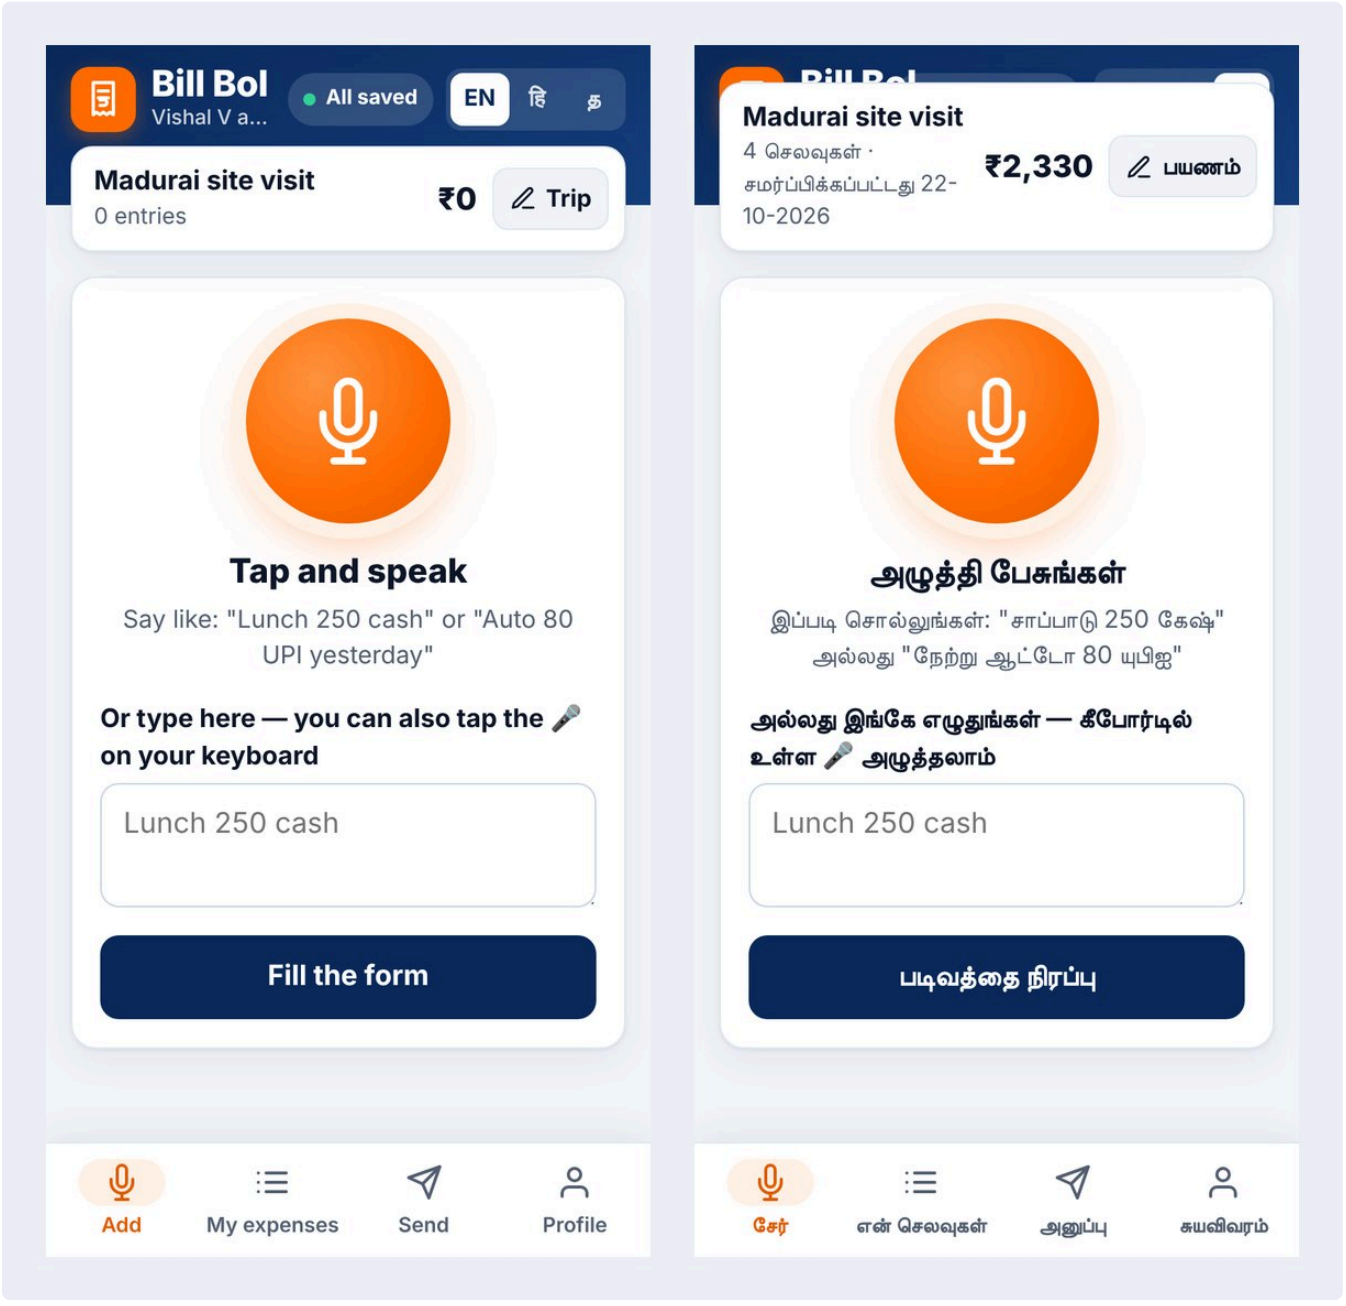

Each claim belongs to a trip. Name it and enter any advance you took, so the app works out what you will get back.

1. Tap **Trip** on the white bar at the top.
2. Enter the **trip or site name**, for example "Madurai site visit".
3. Enter the **advance taken** in rupees (leave 0 if none).
4. Tap **OK**. The bar shows the trip name, the number of entries and the total spent.

Step 3: Speak an expense

Say the expense in one sentence: what it was for, how much, and how you paid. Speak in English, Hindi or Tamil.

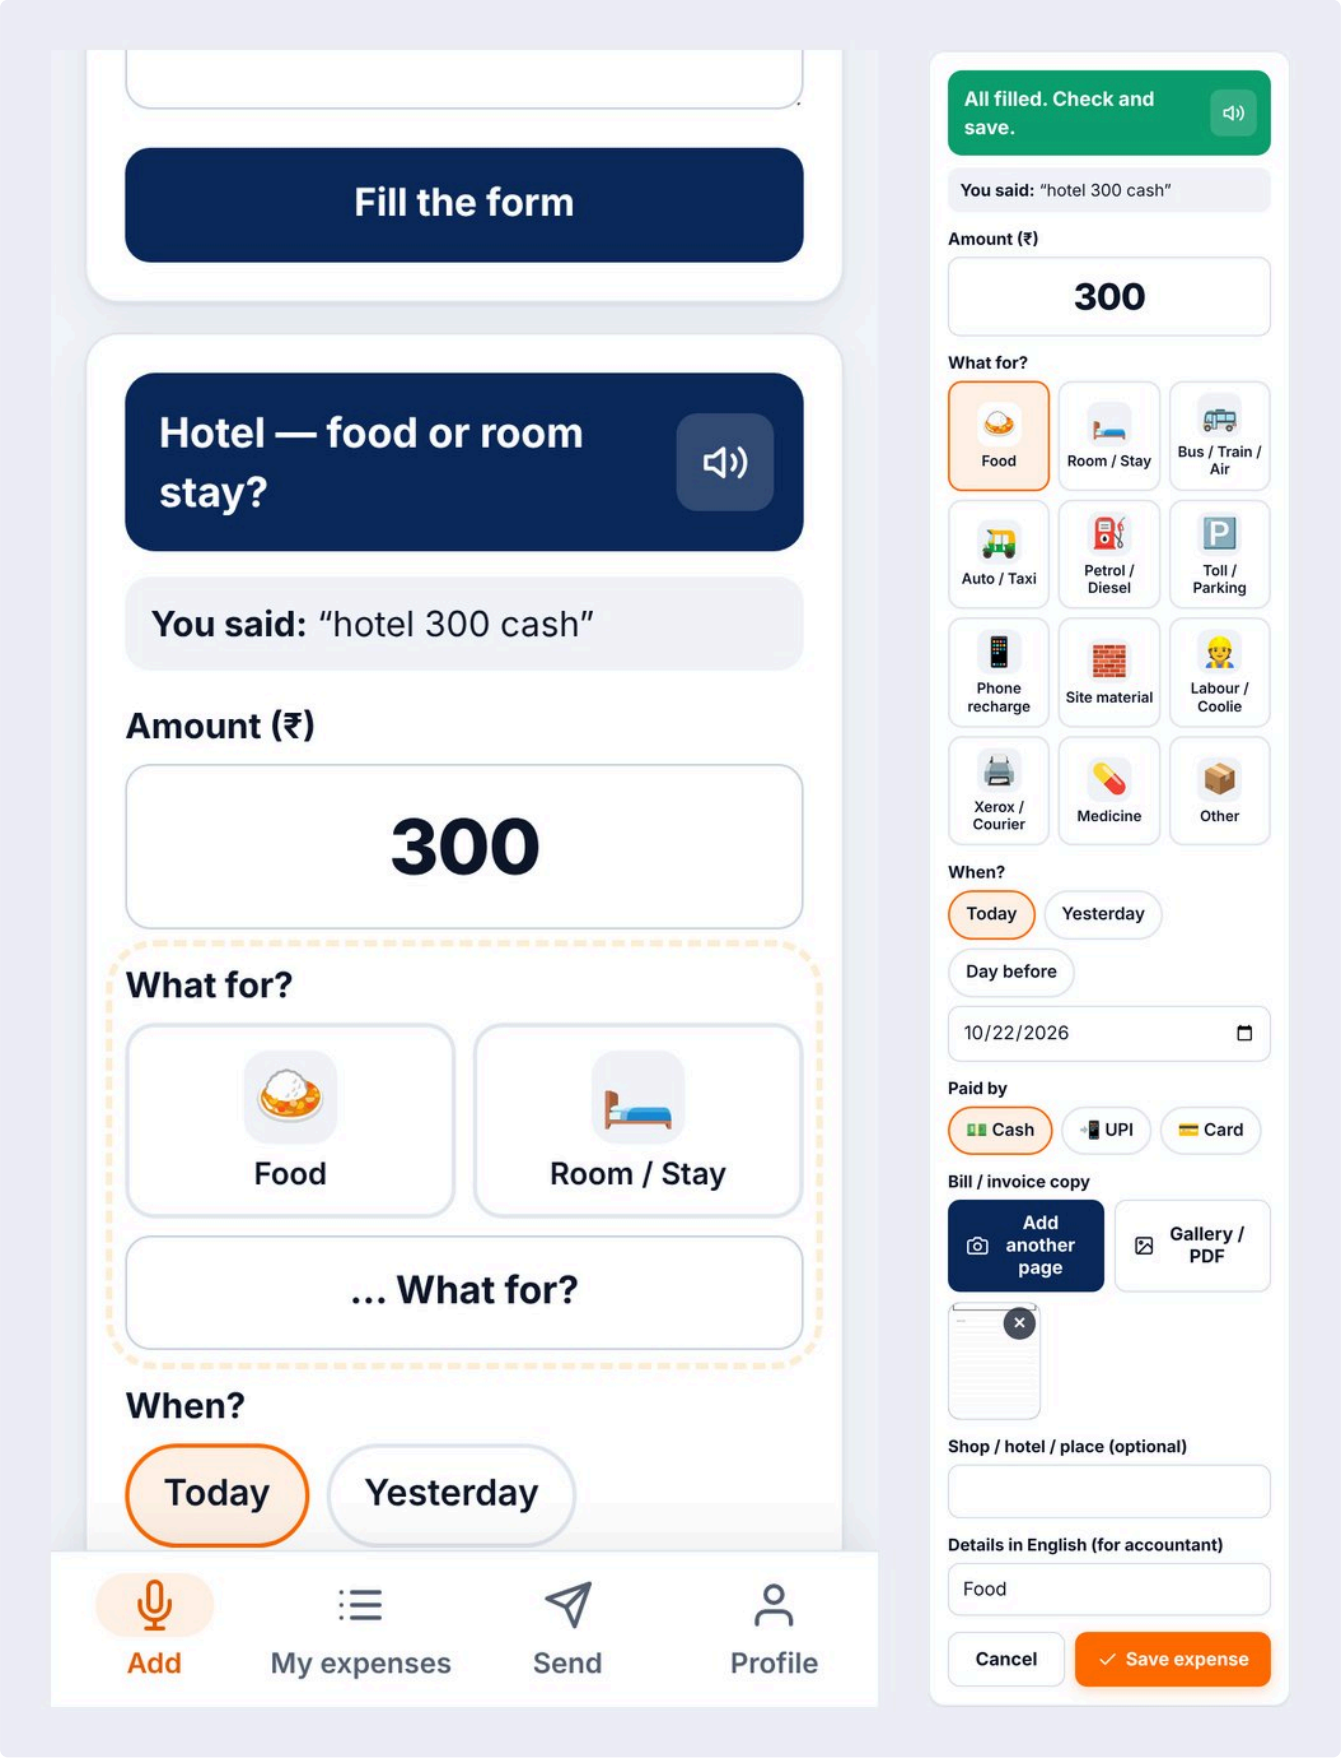

1. Tap the big orange **microphone** and speak, for example:
   - "Lunch 250 cash"
   - "Bus from Chennai to Madurai 450 cash yesterday"
   - "சாப்பாடு 250 கேஷ்" or "कल ऑटो 80 यूपीआई"
2. The words appear in the box. Tap **Fill the form** if the form does not open by itself.
3. No mic button? On some iPhones the app shows a box instead: tap the box, then the 🎤 on your keyboard, and speak.

You can also simply type the sentence in the box.

Step 4: Answer the questions and attach the bill

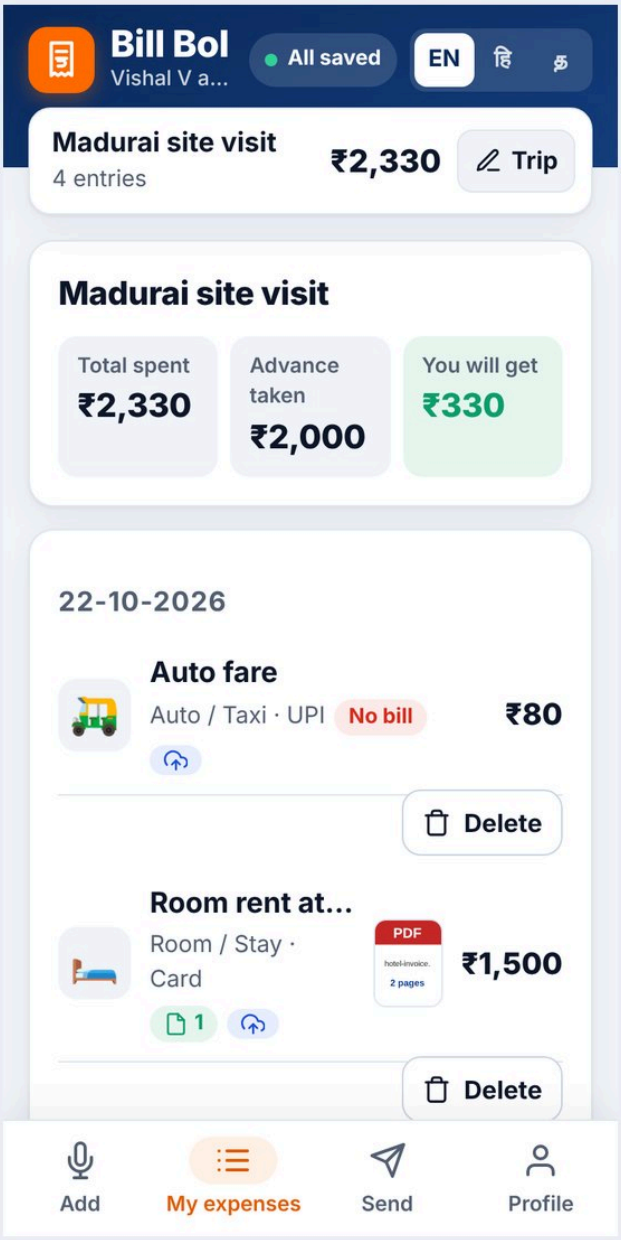

The app fills what it understood and asks, by voice and in the blue bar, only for what is missing. It never guesses.

1. Read the **blue question bar** (tap 🔊 to hear it again) and answer by tapping, for example **Food** or **Room / Stay**.
2. Check the **amount**, the **category picture**, the **date** (Today, Yesterday or another date) and **paid by** (Cash, UPI, Card).
3. Attach the bill:
   - **Take photo** opens the camera; tap **Add another page** for long bills.
   - **Gallery / PDF** picks a photo or a PDF invoice (hotel, cab, train, flight).
   - **No bill** if there is none, then choose the reason.
4. When the bar turns green ("All filled"), tap **Save expense**. The entry uploads to the company records when online.

Step 5: Review My expenses

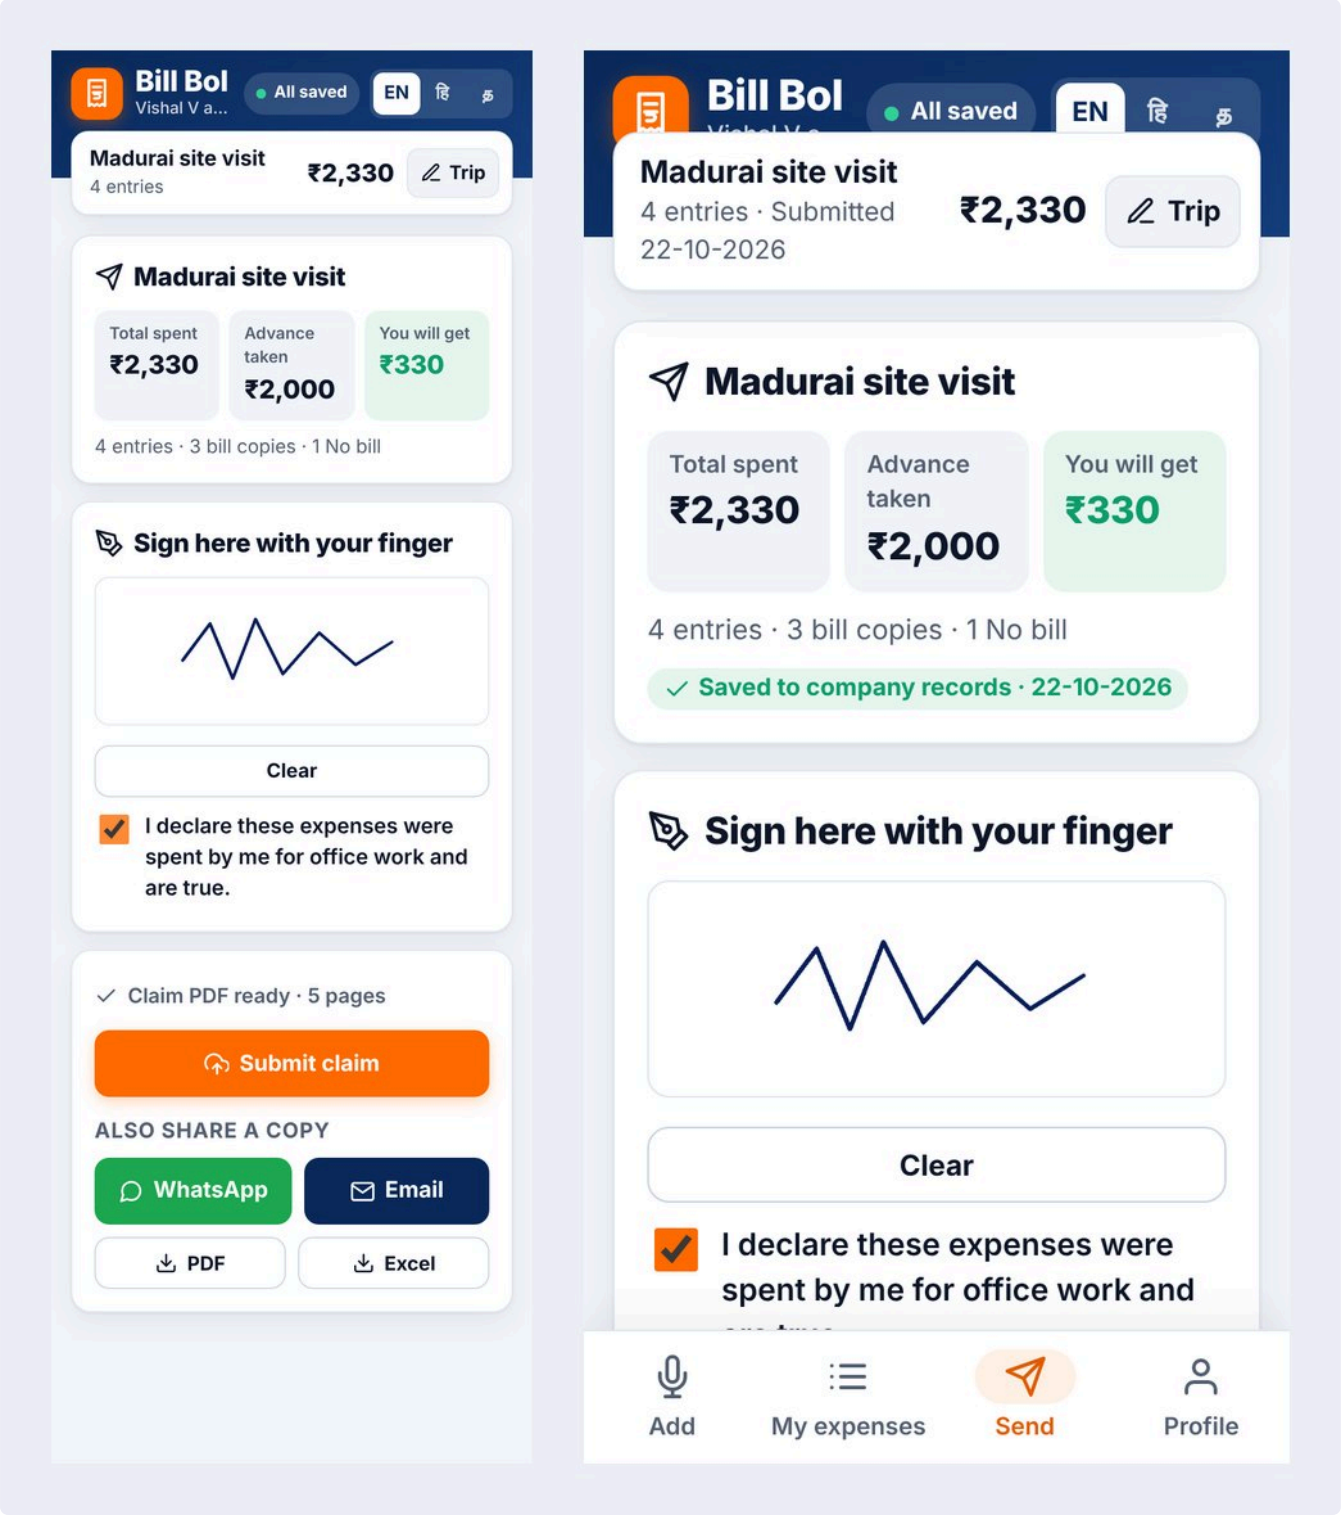

My expenses lists the trip's entries by date, with the totals at the top.

- The three boxes show **Total spent**, **Advance taken** and **You will get** (green) or **You must return** (red).
- Each entry shows its picture, category, payment mode, a bill badge (or red **No bill**) and a cloud mark once uploaded.
- Tap an entry to **edit** it. Tap **Delete** twice to remove it.
- **Start new trip** begins the next claim; earlier trips stay listed below with their status.

Step 6: Sign and submit the claim

On **Send**, sign once with your finger, confirm the declaration and submit.

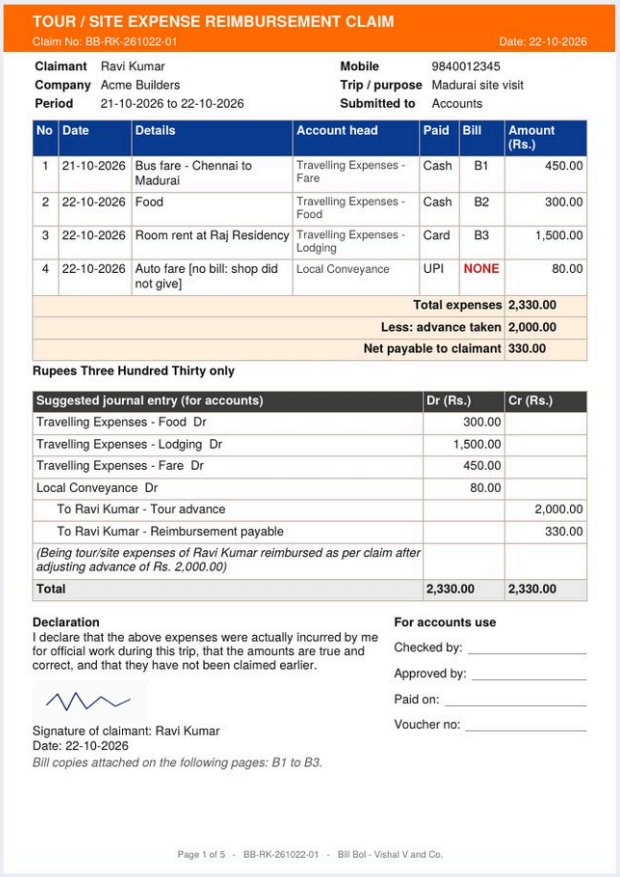

1. Check the totals at the top.
2. **Sign** in the white box with your finger and tap **Save signature**. It is reused for later claims.
3. Tick **I declare these expenses…**.
4. Wait for **Claim PDF ready**, then tap **Submit claim**. The claim PDF goes to the company records and the trip shows **Saved to company records** with the date.
5. Optional: **WhatsApp** or **Email** shares a copy of the PDF with anyone; **PDF** and **Excel** download the files.

The badge at the top right shows **All saved** when everything has uploaded, or how many items are waiting (they upload automatically when internet returns).

The claim PDF

The claim is one PDF: a one-page claim form followed by every bill copy, in entry order.

TOUR / SITE EXPENSE REIMBURSEMENT CLAIM

Claim No: BB-RK-261022-01 Date: 22-10-2026

Claimant Ravi Kumar **Mobile** 9840012345

Part	What it shows
Page 1, header	Claim number, date, claimant, mobile, company, trip, period
Page 1, table	Each entry: date, details, account head, paid by, bill reference (B1, B2… or NONE in red), amount; total, less advance, net payable; amount in words
Page 1, journal	Suggested journal entry for the accounts team
Page 1, foot	Declaration, signature, and a "For accounts use" box (checked by, approved by, paid on, voucher no)
Next pages	Each bill photo or PDF invoice page under a blue label: bill number, entry, date, amount

Part	What it shows
Last page (if any)	The original Tamil or Hindi words spoken, for verification

The form always fits one A4 page: the font shrinks for long trips (14 pt for short claims, down to 7 pt).

For accountants: connect the Google Sheet database

Connect once; after that every entry, bill copy and claim from your clients' staff lands in your Google Sheet and Drive.

Set up the sheet (once, about 10 minutes)

1. Create a Google Sheet. Use a browser window signed in to **only** the Google account that owns it (Incognito works).
2. **Extensions → Apps Script**: paste the file BillBol-GoogleSheet-Database.gs, save.
3. Reload the sheet. Menu **Bill Bol → 1. Set up sheets**, approve access. Note the **access key** shown.
4. In Apps Script: **Deploy → New deployment → Web app**, Execute as **Me**, Who has access **Anyone**. Copy the **Web app URL** (ends in /exec).
5. In Bill Bol → **Profile → Company database**: paste the URL and key, tap **Connect and test**. The card turns green.

Connect your clients' staff

1. Profile → **For accountants: client setup link**. Enter your firm name and the client's company name.
2. Tap **Copy link** and send it on WhatsApp to the client's staff. Opening it connects their phone to your sheet.

What you get in the sheet

Sheet	One row per	Key columns
Expenses	Saved entry	Date, employee, company, trip, category, account head, details, paid by, amount, bill links, claim no, status
Claims	Submitted claim	Claim no, employee, trip, period, total, advance, net payable, **Open claim PDF** link, status dropdown (Submitted, Checked, Approved, Paid, Rejected), approved by, paid on, remarks
Employees	Staff member	Name, mobile, company, employee code, designation, first and last seen

Bill copies and claim PDFs are saved in Drive under **Bill Bol Claims / Company / Employee**. Use File → Download → Microsoft Excel for an Excel copy.

Troubleshooting

Problem	What to do
Install option does not appear (Android)	Open the link in Chrome, not inside WhatsApp; the address must start with https://. Close and reopen Chrome once.
Big mic does not work (iPhone)	Switch on Settings → General → Keyboard → Enable Dictation, or use the 🎤 on the keyboard.
Mic or camera blocked	Tap the lock icon in the address bar → allow Microphone and Camera.
Badge shows "Upload failed" or a number waiting	Check internet, then tap the badge to upload again. Entries are safe on the phone meanwhile.
"Wrong access key"	Re-enter the key from the sheet (Bill Bol → Show access key), or open the latest setup link.
PDF invoice not accepted	Password-protected or larger than 10 MB. Take a screenshot of it and attach that.
Apps Script shows "Unable to open the file"	Several Google accounts are signed in. Use an Incognito window with only the sheet owner's account.
App opens blank from a file	Bill Bol runs only from its web link, not from a downloaded file preview.
Need to check what the phone supports	Profile → Phone check → Copy report, and send it to your accountant.
