Liquidity & credit risk

BOARD BRIEFING | 90-day scenario | Management review

BASELINE RECEIPTS	STRESSED RECEIPTS	PEAK FUNDING GAP
155.23M	**155.23M**	**1.04M**
AED / within horizon	0.00M at risk	Against minimum cash floor

01 / EXECUTIVE ASSESSMENT

The scenario breaches the minimum cash floor in the week starting 2026-10-25. Peak funding need is AED 1,040,616; closing cash is AED 57,374,607. Review funding capacity and payment timing before the first breach.

SCENARIO AT A GLANCE

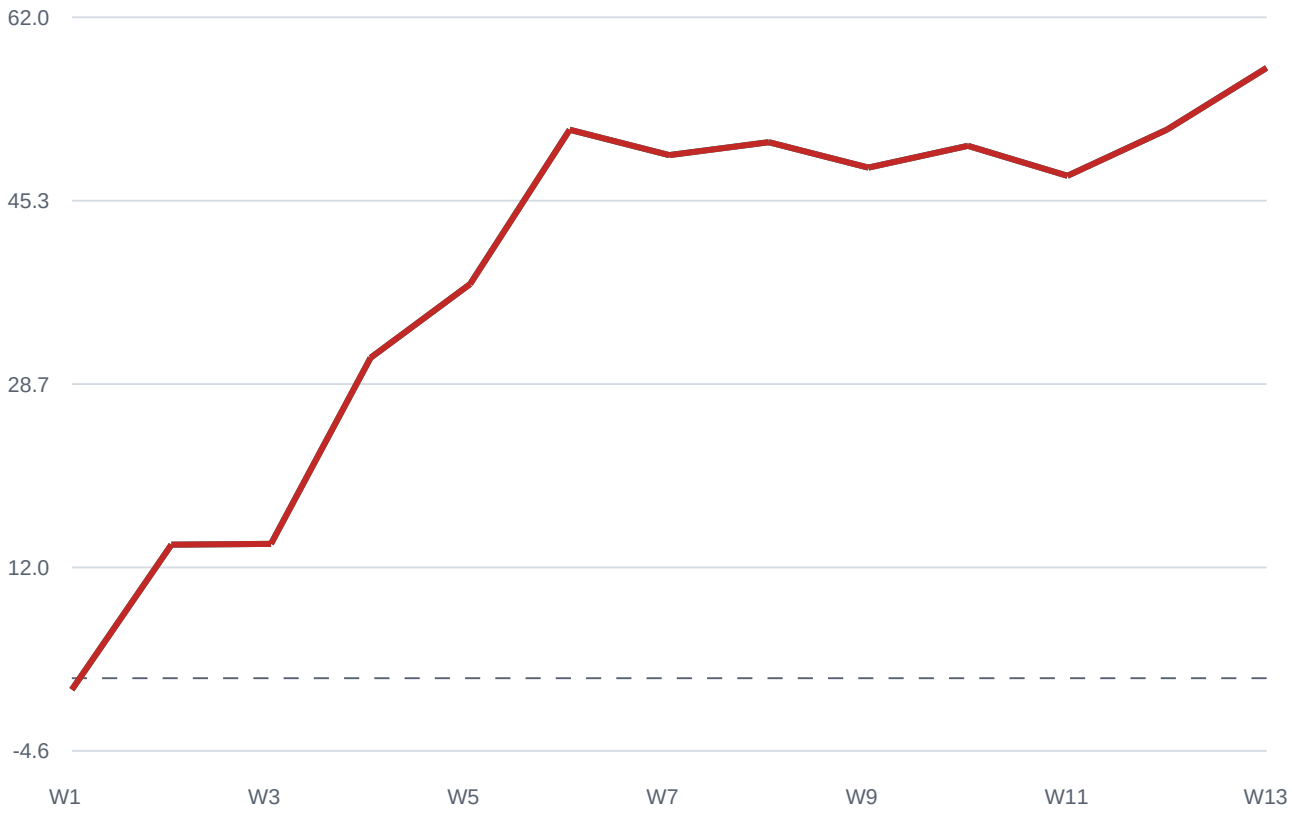

0-day additional delay | 0% broken promises | Default: None. Opening cash AED 5,000,000; operating outflows AED 8,000,000 per week.

02 / MANAGEMENT PRIORITIES

Customer	At-risk receipts (AED)	Proposed response
No records under the current selection.		

Cash trajectory

Baseline versus stressed weekly closing cash | AED millions

Baseline **Stressed** Dashed: minimum cash floor

OPENING CASH	STRESSED CLOSING CASH	FIRST FLOOR BREACH
5.00M	**57.37M**	**W1**
AED	AED / end of horizon	2026-10-25

Reading the chart: delays can move receipts outside the forecast horizon. Such receipts are excluded from period cash, not written off. This is a weekly closing-cash view, not a daily treasury forecast.

Cash reconciliation

Weekly bridge from opening cash to scenario closing cash | AED

Week / start	Base receipts	Stress receipts	Outflows	Closing cash	Floor gap

Scenario basis & ECL

Assumptions, portfolio aging and illustrative provision | AED

03 / FORECAST ASSUMPTIONS

Baseline Base; promise reliability 90%; extra baseline delay 0 days. Stress: 0 additional days; 0% broken promises; default None. Horizon [2026-10-25, 2027-01-23) excludes the end date.

CASH BRIDGE / AED

5,000,000 opening + 155,231,750 receipts - 102,857,143 outflows = 57,374,607 closing. Final-week outflows are prorated. Cash inputs are illustrative, not ledger balances.

04 / ILLUSTRATIVE ECL MATRIX

Aging	Balance (AED)	Loss rate	Provision (AED)
Current	149,291,106	0.5%	746,456
1-30	20,226,157	2.0%	404,523
31-60	11,236,751	6.0%	674,205
61-90	6,742,051	15.0%	1,011,308
90+	6,742,051	45.0%	3,033,923
Total	194,238,108		5,870,414

ECL is separate from liquidity stress. This unadjusted demo matrix does not use the editable Provisioning page overlay. It supports discussion of IFRS 9 / Ind AS 109; it does not establish compliance or an approved impairment charge.

Methodology & limitations

Transparent model basis | Synthetic case study, not proven business outcomes

01 / Collection probabilities

Rules-based estimates, not a trained AI model. Low 96%, Medium 85%, High 65%, Critical 40%. Optimistic adds 8 percentage points and halves DBT; Conservative subtracts 15 points and scales DBT by 1.5. Probabilities are capped at 100%.

02 / Due dates and promises

Due-date portions use historical days beyond terms (DBT). Overdue estimates use the snapshot plus at least seven days. Valid future promises replace only their committed portion and multiply probability by promise reliability. Missed promises revert to an overdue estimate; invoice principal is never allocated twice.

03 / Stress interpretation

Additional delay shifts all forecast dates. Broken promises reduce only promise-backed expected receipts, with no recovery assumed in the horizon. Selected default means zero collections within the horizon, not a booked impairment. Management actions are proposals, not approved commitments.

04 / Scope and exclusions

Cash equals opening cash plus risk-weighted receipts less operating outflows. Weekly closes do not detect intraday gaps. New sales, financing, tax schedules, actual collections backtesting and validated forecast accuracy are excluded. All accounts, rates and scenario inputs are illustrative.

05 / Evidence and precision

The appendix lists every payment allocation, including dates beyond the horizon, with its outstanding portion, probability and expected receipt. Displayed AED values are rounded to whole units; calculations retain precision, so rounded rows may differ marginally from totals. Portfolio data is synthetic and does not represent real customers.

Invoice evidence appendix

All allocations | Principal x probability = expected receipt | AED
